

Clarus

Clarus IoT Solutions

Clarus Broadband offers clearHome capabilities that provides homeowners security, comfort, convenience and energy efficiency. The perception of a “smart home” environment can be complicated and overwhelming! Clarus Broadband makes it easy by offering a complete solution that is designed, implemented, and managed to ensure the customer has an outstanding experience. In addition, the clearHome Phone App integrates clearHome control into a user app and web-based management portal. This gives the customer phone app control of their devices at their fingertips and remote administrative/support control to help them in unique situations.
